

Contract Low Pressure Overmoulding Services

Overmould helps customers in electronics manufacturing & cable/harness manufacturing sectors to master the challenge of the ultimate protection and seal for their finished product.

As the UK partner for [Moldman Low Pressure Molding equipment](#) and [Henkel's Technomelt polyamides](#), we specialise in moulding directly on to electronic assemblies, including PCBs, sensors and other sensitive components, providing a totally sealed and encapsulated product to offer instant protection from moisture, vibration and other challenging environmental conditions.

It's a fast and cost-effective alternative to conventional encapsulation or potting.

Our experienced team can work with you on tool development, prototype runs and [full contract production services](#). You can expect comprehensive consultation, meticulous attention to detail and quality results.

- Protect electronic devices from heat, water, dust, and stress
- Low injection pressure – reduced risk of damage to delicate, valuable components
- No more potting or slow, messy encapsulation with resins
- Volumes in the 10's, 100's and 1000's are handled easily
- Fast – devices can be turned into a robust product and shipped within minutes!
- ISO9001 certified, issued by CQS Ltd

If you would like to learn more about partnering with the specialists in Low Pressure Moulding, **call us on 01525-373800 or email sales@overmould.com to arrange a consultation.**
